MUIR'S SCICIDE. Domestic Difficulties is Said to be

the Cause of His Desperate

The Albuquerque Democrat of Tuesday, gave a lengthy account of the uicide of Geo. Muir, which occurred in Albuquerque on Saturday night. The details are sickening in the extreme. Muir arrived in Albuquerque on Monday night, May 9th, from the east, and had been drinking heavily. He kept up his spree during the entire week, until Saturday, when he appeared to sober up somewhat. He called at the telegraph office at 9 o'clock, apparently all right, Au hour later he was discovered on the flat roof of a one-story building, adjoining his lodging house, by parties who thought he was crazy. Ex-Mayor Lail possible on the road until it is completed was sought for, as he had brought Muir to the lodging house. Failing to find Lail, they instituted a search for Muir, who in the meantime had disappeared from the roof. He was

FOUND NEAR AN ACEQUIA. into which he had fallen, whether intentionally or accidentally, could not be determined. He was dead when found, The weapon used, was steel bladed paper knife. He had taken with him on the roof, a rope and a loaded bull dog pistol, being apparently undecided as to what method of self-destruction he should two miles west of the Pine springs, on select. A number of pieces of gold and silver coin were found near his body, which had fallen from his pocket, in the desperate death struggle, which occurred. On the roof of the house, where be was first seen, he had left his coat, vest

watch, which he owned. The JOURNAL-MINER in its first account of the suicide, mentioned the fact that there was an undercurrent, of some kind in the life of this man, of which nothing was known, which impelled him to strong drink. The Democrat gives the following as being the cause, and which will be a surprise to his friends: "It was not known that he

HAD A FAMILY, But since he has been here, he has frequently spoken of domestic troubles and pression that he had just returned from journey to that city for the purpose of effecting a reconciliation, which he had failed to accomplish.

He told of his career in Washington City, where he occupied a lucrative position in the signal service under General Hazen. There he met the fair young daughter of a wealthy man and ex-senator in the New York state assembly, Their acquaintance ripened into friendship, friendship into love, and finally their troth was plighted, notwithstanding the parental protest. A marriage fected and years of happy home life followed, brightened and blest by two cherub children. Then came the fated day when drink seduced the faithful bushand and loving father until a separation became necessary, and the wife went to her father's home, taking with her the two children. Returning from his fruitless journey for the purpose of effecting a reconciliation, he was met here by a notice from General Miles that the telegraph office having been abandoned at Fort Whipple, he would not be able to give him employment. This, doubtless, added to his despondency and hastened the fatal determination "

Samuel S. Shull, a Stock Man o the Magallan Mountains, Shot Down in His Cabin.

Sheriff Mulvenon received a telegran this afternoon, from Henry Mehrens, at Camp Verde, stating that Samuel S. Shull, a well known stock man of the Mogollon mountains, had been found dead in his cabin, shot through the head with a shot gun. His ranch was about the Mogollons, thirty miles above Beaver Head, on the old stage road No particulars of the affair are given but it is known that about a week ago Shull had trouble with one of his neigh-

bors, whom he beat pretty severely. On receipt of the news Sheriff Muland hat, and on them the fine gold venon immediately started to the scene of the murder, and will institute a thorough investigation.

> Deceased formerly lived in Prescott and owned property here, where he was well known. He was 38 years old.

We are informed by a party up from Hamilton's this morning, that a deputy sheriff of Tombstone, arrived there yes terday, and stayed overnight with a prisoner, that while in Walnut Grove he chanced to recognize as wanted by Sheriff John Slaughter, of Cochise, for family in New York, creating the imthe murder of no less, than five persons. The young man under arrest, was until a fortnight since, stopping in Prescott, and will be remembered as being lame in one foot, with the shoe cut open on the dence, he confided the partial story of top and wacking with a cane, also his life and the faults of habit, or woes as having a deformity—natural or perprotuberance over said optic, disfiguring his otherwise comely phiz. His name is Bass, and he wears the jewelry like an old hand at the business.

The American Magazine Magazine contains a great variety of articles, among which are at least four ompleted short stories.

The frontispiece depicts a "star-route" ostman carrying the mail through an almost untrodden wilderness where wild animals are his only and almost unwelome companions. This unsettled region is further described under the title of "The Last Remnant of Our Frontier" in an illustrated acticle by Ernest Inger-

The story of social life among the Knickerbocker families of New York at the present day, entitled "Olivia Delaplaine," by Edgar Fawcett, is continued in this number.

"A Woman's Experience in the War," by Miss Emma C. Cooke, of Washington, will serve as a change from the narworks completed by December 1st, ratives of veterans who are fighting their battles o'er again.

Under the title of "Mother Ann's Children" Prof. Van Buren Denslow describes the faith and worksf o Shakers -Their strange doctrines, queer dances and thrifty industries.

The House of Representatives furnishes Z. L. White with material for continuing his descriptive sketches of "Our Nation's Lawmakers." Many potraits of noted Congresman adorn this article. Thos. E. Miller, of Skull valley, came

in yesterday to lay in a fresh supply of "truth and veracity." As the citizens of that "Gulch" depend on him for the above articles, it causes a pretty heavy drain on him, but he is always equal to any emergency. After laying in his fresh stock yesterday, he ran across a reporter of this paper, and gave him a couple of samples, just to keep his hand in. We have never seen a man that loved to "spin a yarn" better than Mr. Miller, or that could tell an improbable story, with as many details of probability as he, and with such emphatic impress of truth. After all, his jokes are harm-Strickland, W. C. Dawes, E. C. Wager, less, and a wamer hearted, better natured or more generous or hospitable

man than "Tom" Miller, is rarely found. The "American Graphite" pencils manufactured by Jos. Dixon Crucible company, of Jersey City, New Jersey, seems to embody the highest degree of perfection possible to be attained. They are made in ten degress of hardness, so that any can be suited, and any class of work provided for. The leads are unsurpassed for smoothness and toughness. Busy writers now no longer bother themselves with a scratching pen, and the dipping of ink, but select a "Dixon" pencil, "Hard," "Soft," "Soft Medium," or "Medium," according to their liking. and with ease and comfort "pen" their
